

SMART WATCH PLANS

PLAN TERMS – SIM ONLY PLAN

Version 3

Date 17 September 2020

General Terms

1. You'll need to stay with us for a minimum of 30 days and pass our standard credit check. Monthly charges assume online billing. Your allowance will commence on your contract start date. EE's Pay Monthly Network terms apply to your use of this service: see ee.co.uk/terms.
2. Smart Watch Plans are only available as a second line to new and existing Consumer and Small Business Customers on a Pay Monthly or SIM only phone plan (a "Primary Device Plan") with a compatible phone ("Primary Device").
3. There are two types of Smart Watch Plans:
 - a. the "Personal Paired Plan", which shares the phone number of your Primary Device Plan and must be paired at all times to a compatible handset on the EE network on an eligible plan in order to use data or receive/make calls and texts on your Smart Watch. Your Primary Device Plan and Personal Paired Plan must be on the same Account.
 - b. the "Family Member Plan" which operates independently of the Primary Device using its own number and allowances for calls, texts and data. You will need to connect your Smart Watch to a Primary Device to set up, after which it no longer needs to remain paired (you may need to re-pair to your Primary Device to update settings).
4. See below for the compatibility of Smart Watch Plans with each Smart Watch.
5. An additional Smart Watch Plan is required if you wish to pair your Smart Watch to a second number on the EE network.
6. The Smart Watch Plans are not eligible for the Multiplan discount.
7. You'll need 4G coverage to use mobile internet on your Smart Watch. You can only use mobile internet on our 4G network if you're within a 4G enabled area and in range of a 4G base station. 4G isn't available everywhere in the UK. You can check your coverage at ee.co.uk/coverage.
8. Smart Watch Plans give you access to speeds of up to 60Mbps in the UK on your Smart Watch. The speeds you achieve will also depend on a number of factors including: your location, the device you are using and geographic factors such as tree coverage and population density. If you are using your Smart Watch or Primary Device indoors, the materials of the building you're in may also affect mobile internet speeds. Data is UK use only. Access to our enhanced 4GEE speeds will also be impacted by the location of our masts and equipment optimised for enhanced 4GEE speeds. 4G coverage required. Such equipment is not available everywhere in the UK and so you should check your coverage at ee.co.uk/coverage before selecting your plan.
9. You cannot use your Smart Watch as a modem ('tethering'), for peer-to-peer or other internet file sharing.
10. Smart Watch Plans are for person to person use from your Smart Watch and is subject to your acceptance of our standard terms and conditions for pay monthly services. We monitor use in accordance with those terms. The terms state that you can't use these plans to sell access to our network to anyone else. They are also not to be used for anything unlawful or to send nuisance communications. At the moment, we'll decide that

you're breaking these terms if you text and/or call more than 300 different numbers in a month. Remember, we're free to decide that other types of use may also be breaking this term. If you do break this term, we'll contact you and ask you to stop and if you don't then we may disconnect your Smart Watch and your Primary Device from our network.

11. It is not possible to purchase selected add-ons for your Smart Watch Plan, including entertainment and content add-ons such as Apple Music.
12. Roaming is not available on Smart Watch Plans.

Family Member Plans

13. The Family Member Plan includes an allowance of calls, texts and data for use in the UK subject to coverage.
14. You can use your allowance of minutes and texts when in the UK to call and text customers of UK mobile networks and UK landlines starting with 01, 02 & 03 (mobile and landline numbers to Jersey, Guernsey and Isle of Man not included).
15. Calls to numbers starting with 08, 070, 09 and 118 are not included in your inclusive allowance of minutes. Calls to numbers starting with 084, 087, 09 and 118 will be split into two parts:
 - the Access Charge – this is the amount that is charged by EE as set out in the Price Guide;
 - the Service Charge – this is charged by the organisation you are calling. The amount of the Service Charge is set by them and should be stated anywhere the number is advertised.

The Access Charge is added to the Service Charge to give your total cost of call. For further information <https://ee.co.uk/help/help-new/billing-usage-and-top-up/call-text-and-data-charges/charges-for-calling-non-geographic-numbers>.

16. If you cancel the Plan for your Primary Device, you will be able to continue using your allowances on your Family Member Plan. However, if changes need to be made, for example if your Smart Watch undergoes a factory reset, you may not be able to re-pair and reactivate your Family Member Plan if your Primary Device is not on the EE network.

Personal Paired Plans

17. The Personal Paired Plan does not include an allowance of calls or texts. When you are in the UK, subject to coverage, you can use your Smart Watch on a Personal Paired Plan to make and receive calls and texts using the allowance from your Primary Device Plan. These activities will decrement from the allowances on your Primary Device Plan. Any chargeable activities will be charged in accordance with your Primary Device Plan and will show on your Primary Device Plan's bill. The telephone number for calls and texts will display on the recipient's device as that of your Primary Device Plan.

18. If you cancel the Plan for your Primary Device, you will be unable to use data or receive/make calls and texts on your Smart Watch until you pair it to another EE number and compatible phone.
19. If your primary device is switched off, you will not receive text messages on your Smart Watch.
20. Whilst your Smart Watch is in proximity to your Primary Device connected via Bluetooth, your Smart Watch will use the data allowance from your Primary Device Plan. If your Smart Watch is not in proximity to your primary device or the two devices are not connected via Bluetooth or on the same WiFi network, the Smart Watch will use the data allowance from your Personal Paired Plan.

Apple Watch Terms

At the date this document is published, the Apple Watch Series 3, Series 4 and Series 5 are compatible with the iPhone 6 or any later release (running iOS 13 or later).

The Family Member Plan is only available on the Apple Watch Series 4 or any later release, running Watch OS7 and for set up must be paired with an iPhone SE (1st/2nd generation)/iPhone 6S or newer and running iOS 14.0.

Device compatibility is subject to change; refer to [Apple's website](#) for the latest compatibility.

The Apple Watch app is pre-loaded on your iPhone. If your iPhone does not have the Apple Watch app (for example, because you have uninstalled it) you will need to download it to your iPhone. The Apple Watch app is free, but data charges may apply when you visit the App Store and download it.

You may need to download music to your Apple Watch from your music app to listen, subject to app functionality. Subject to availability.

Samsung Galaxy Watch Terms

At the date this document is published, the Samsung Galaxy Watch is compatible with Samsung handsets running Android 4.3 or higher with 1.5GB RAM or more. Device compatibility is subject to change; refer [Samsung's website](#) for the latest compatibility.

The Galaxy Wearable app is required to manage the features of your Samsung Galaxy Watch. If your device does not have the Galaxy Wearable app you will need to download it to your device. The Galaxy Wearable app is free, but data charges may apply when you visit the Google Play or App Store platforms and download it.

Family Member Plans are not available with the Samsung Galaxy Watch.
