20th March 2024

## Faster speeds in more places than any other UK broadband provider

We have reviewed the details of all major and emerging Broadband Internet Service Providers across the UK and their broadband speed capacities. This review took place between 10/07/2023 to 20/03/2024.

EE's Busiest Homes Bundle is the only broadband in the UK that provides access to the fastest speeds available on the Openreach full fibre network. With download speeds of 1.6Gbps, it is the UK's fastest widely available broadband, offering faster speeds to more homes across the UK than any anyone else.

The table below includes details of the Busiest Homes Bundle and the faster broadband packages identified during our review, which have much more limited geographic coverage.

### UK ISPs

Provider	Top speed	Availability
EE	1.6Gbps	Available to 13.13m residential premises across the UK, including all major cities
Community Fibre	3 Gbps	roximately to approximately 1.4m residential premises in London only
Virgin Media	2Gbps	Available to approximately 800,000 residential premises in various locations
